

# Review/Reschedule Priority Requirement

Target Audience: DUHS SURGEONS

There is an additional requirement in the **Case Request Order**. When creating the Case Request Order for an elective surgery or procedure, you will now be required to prioritize the case in the event it must be rescheduled.

## WHY THE NEW REQUIREMENT?

Due to the current COVID-19 pandemic, the continued ability to perform elective procedures is uncertain. If cases are cancelled, this field will help the OR Scheduling staff prioritize the elective cases once procedures can be performed again at that location.

## CASE PRIORITY DEFINITIONS

The Case Priority (COVID-related considerations) classifications fall into three categories:

Case Priority	Definition
<b>Priority 1: Urgent</b>	Should be performed in 1 week
<b>Priority 2: Time Sensitive</b>	Should be performed in 1 month
<b>Priority 3: Not Time Sensitive</b>	Can be performed greater than 1 month

## Customizing the Depot Workspace, PAGE 2

If you ever need a reminder of these definitions, they are available to you using the “Hover to Discover” function within the Case Request Order.
